Discover smarter cleaning

The commercial cleaning industry is changing

Cleaners, facilities managers and building owners are under huge pressure. In the near future, there'll be more vacuuming to do, fewer people to cover the work, tightly squeezed profit margins and the need to keep up with smart technology.

The industry needs to increase efficiency and reduce costs by speeding up cleaning and logistics processes

The turnover rate for cleaning staff is almost 200% on average, and there's been a 10% increase in vacant cleaning roles in recent years

Contracts are becoming increasingly competitive, so it's essential to measure performance and offer higher service levels

Asset-heavy operations can make it hard to keep capital expenditure below 2%

Introducing: The cobotic evolution

SoftBank Robotics is leading the cobotic evolution, an innovative movement in smarter cleaning, in partnership with ICE Robotics.

It's all in the name; cobotics is the collaboration between humans and robots, leveraging the strengths of both. This means working together and using smart technology to build cleaner, more hygienic environments and better working experiences for all.

Say hello to Whiz, the cobotic vacuum sweeper

Whiz is here to welcome the new movement in smart technology for the commercial cleaning industry. The first of its kind, Whiz is an innovative product for a future-facing cleaning industry.

Whiz shares the workload by taking on the repetitive task of vacuuming. By working alongside Whiz, cleaning teams will waste less time and energy, freeing them up to focus on more skilled and higher value tasks.

Whiz is here to help

Staff will play an essential role in training Whiz and overseeing its progress, all through an easy set-up experience and operation system.

Whiz means

- Smarter cleaning
- Better performance
- Increased productivity
- Improved health and welfare for everyone in the building

| 6 reasons to love Whiz

- 1 Promotes an efficient and collaborative workforce, with cleaners and Whiz sharing the workload**

85%

Whiz can vacuum 85% of available floor space on its first pass (compared to 33% by a manual vacuum cleaner)

- 2 Provides data-driven, measurable results**

44%

Whiz is 44% more energy efficient than a Henry 240 vacuum cleaner

- 3 Performs a deeper clean, each and every time**

93%

Whiz vacuums 93% more square meters per minute than a manual vacuum cleaner

- 4 Lessens the impact of gaps in the workforce**

100%

Whiz achieves up to 100% vacuum coverage, 100% of the time with the combined effort of Whiz and a cleaner

- 5 Frees up time for staff to do higher value tasks**

69 minutes

Whiz frees up 69 minutes of cleaners' time for every 500sqm of floor space vacuumed

- 6 Offers a straightforward, cost-effective and service-driven licensing model**

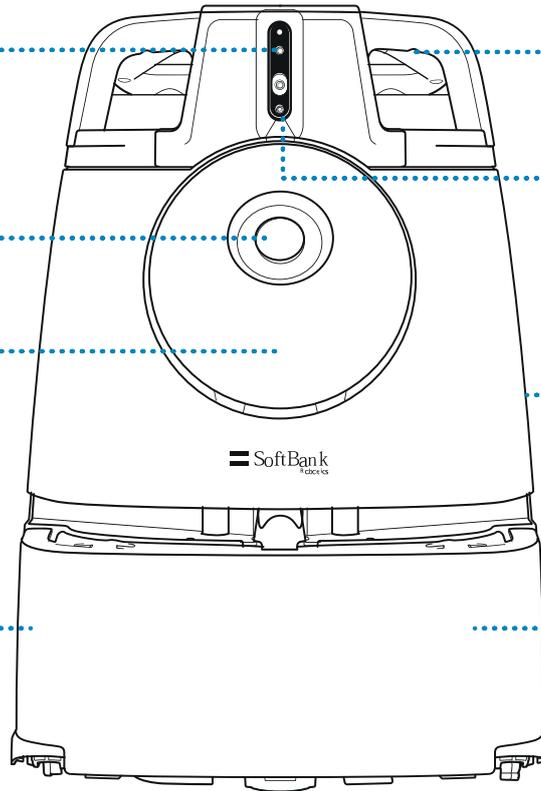

Getting to know Whiz

Real time alerts tell your team when Whiz is done or needs a hand

Hepa filter captures 99.97% of PM2.5 particles including pollen and dust

Easy to change Dustbox with 4.0L capacity

Whiz measures 18.6in x 17.9in x 25.7in

Award winning Brain OS Navigation Software

Built in sensors ensure Whiz automatically avoids people, walls and stairs

Runs 3 hours and cleans up to 1500 sq ft on a single charge

User friendly. Works out of the box

What powers Whiz?

BrainCorp is the robotics industry's leading provider of intelligent, self-driving technology.

Whiz is powered by Brain OS®, BrainCorp's commercial operating system. This technology allows Whiz to easily navigate complicated and dynamic spaces. Thanks to analytics, Whiz always delivers accurate, data-driven cleaning.

You can easily show off the efficiency of Whiz's cleaning to key stakeholders. With intuitive daily reports, you can keep track of cleaning, identify opportunities for route optimisation and much more.

Whiz has a great memory; once Whiz has learned a route, the route can easily be transferred to another Whiz unit.

Even better, Whiz's built-in Sim card means that it stays independent of any customer network or WIFI system, so Whiz can carry on with its work without impacting a building's general connectivity.

Breaking down the details

WHO IS WHIZ FOR?

Whiz is ideal for industries including

- Facilities Management
- Hospitality
- Real Estate
- Retail

WHAT'S INCLUDED?

- Whiz unit
- HEPA filters
- Brush
- Notification pager
- Microfibre cloth
- Battery
- Dual slot battery charger
- Dust bags x10
- Home location codes x10

WHAT'S THE COST?

Lease Whiz for €500/month.

Our monthly rolling contract includes all services and support, reducing the total cost of ownership and saving money in the long-term.

WHAT ELSE DOES THE PACKAGE INCLUDE?

- Easy and fast servicing
- Periodic software enhancements
- 24/7 support hotline
- 48 hour replacement device program
- Confirmed cleaning and RoI reports
